Illusions of Location Theory

Consequences for Blue Economy in Africa

Illusions of Location Theory

Consequences for Blue
Economy in Africa

Francis Onditi,
Riara University
Douglas Yates,
AGS Paris (Eds.)

This book questions the relevance of 'location theory' in explaining the coastal-hinterland continuum and the implications for the utilisation of blue economy ecosystem in such a contested space in Africa. It argues that the harmonious relationship between states, and efficient exploitation of the blue economy ecosystem, lies in the structural transformation of markets and bridging the spatial and social divide between coastal and hinterland societies.

Quality commitment

Thanks to our growing community of reviewers all our books are peer reviewed. Committed to producing high-quality titles, we employ tried-and-tested quality control processes in all stages of production. Our editorial checks ensure that all books adhere to high standards of consistency, readability and coherence. We adopt a pragmatic approach to turning around a manuscript quickly and intervene only when necessary.

Editorial values and standards

A work's contribution to knowledge, irrespective of approach or perspective, is the central criterion of our acquisition process. Importantly, our acquisitions are driven by their research impact and current academic trends rather than saleability. Peer review, in-house editorial expertise and collaboration with advisory editors ensure our titles are relevant and of a high academic standard. Our commitment to scholarship has been recognized with inclusion in the lists of academic publishers maintained by the Spanish National Research Council, the Finnish Publication Forum and the Norwegian Centre for Research Data.

Individual attention

We care for and pay attention to the needs of each of our authors. We are responsive to author queries and strive to keep you up to date with manuscript's progress towards publication. We only enlist qualified and sufficiently motivated experts to review your work and guide them to offer constructive criticism. This ensures that peer reviews are thorough, constructive and respectful of your effort as an author.

Maximum exposure

We work closely with our industry and academic community partners to understand current trends and market our titles appropriately. Besides traditional book marketing, we make extensive use of digital marketing tools and are able to work with authors on promotional activities. All our books are also published as e-books and paperbacks. As reported in WorldCat, our books are held by academic libraries worldwide. Our books are also available through a wide range of specialized resellers, e-book aggregators, select academic bookshops and online retailers such as Amazon and Barnes and Noble.

No cost burden & flexibility about sharing

It's simple: we never charge authors for publishing - no hidden fees, no surprises. Our no-charge promise reflects our confidence in commissioning only high-quality works, the quality of our production and the efficiency of our workflow. Authors of monographs are offered complimentary copies of their book and all authors can purchase additional copies at a 40% discount.
